

## **Jager heavy duty indoor flooring**

**The Jager heavy duty plastic flooring is durable plastic cover for covering concrete surfaces to protect the factory floor from damage. It has significant thermal insulation and vibration damping properties, an anti-slip surface and an ergonomic design that creates an ideal working environment.**

**It provides support for the feet and the entire skeletal system, preventing problems caused by prolonged standing. It is the perfect solution for covering industrial halls, garages and workshops. Thanks to interlock tabs, the elements can be easily fitted together to quickly create a continuous, flat surface.**

**Made in Hungary**
