

## Jager dripping pipes

**Dripping pipes are mainly used for irrigating ornamental gardens, orchards and vineyards on flat land, as it allows water to reach the roots of the plant directly. This method is highly efficient and water-saving as it reduces water consumption and minimises evaporation losses.**

**Jager dripping pipes are made of premium quality polyethylene with a UV-resistant additive to make them resistant to the elements for long periods of time. Our tubes are available in different types and in diameters of 16 mm and 20 mm, so they can be easily adapted to the needs of the plantation.**

**Made in Hungary**

<b>Jager dripping pipes - Ø16 mm</b>	
<b>Water dripping</b>	<b>2 l / hour / sprinkler</b>
<b>Thickness</b>	<b>0.8 - 1.1</b>
<b>Pressure</b>	<b>1.2 - 1.4 bar</b>
<b>Diameter</b>	<b>16 mm</b>
<b>Sprinkler distance</b>	<b>33 cm, 50 cm, 100 cmm</b>
<b>Material</b>	<b>Polyethylene</b>
<b>Coil size</b>	<b>100 m / 300 m</b>

<b>Jager dripping pipes - Ø20 mm</b>	
<b>Water dripping</b>	<b>4 l / hour / sprinkler</b>
<b>Thickness</b>	<b>0.8 - 1.2</b>
<b>Pressure</b>	<b>1.2 - 1.4 bar</b>
<b>Diameter</b>	<b>20 mm</b>
<b>Sprinkler distance</b>	<b>33 cm, 50 cm, 100 cmm</b>
<b>Material</b>	<b>Polyethylene</b>
<b>Coil size</b>	<b>100 m / 300 m</b>
